Lannon Stoneman Baseball Banner Sponsorship Artwork Guidelines

Banner Size 36"H x 60"W
Color: Digital, Full Color
Finish: Grommets and Fold Over Hems

Artwork Requirements

Logos: Be sure all logos are native vector files. Typical file extensions will be .AI, .EPS, .CDR. If you cannot open these files on your computer that is ok, it just means you do not have the software to open these file types. If you do not have a vector file of your logo please contact us and we can redraw your logo for a fee.

Photos: All photos must be hires, minimum 300 DPI in order for them to print properly. DPI lower than this will result in poor print quality and will be run as is. We will notify you if we see something that may print unsatisfactory.

Proofing: One proof will be sent to you & Lannon Stoneman for your approval. Please be sure to think about what you want on your banner before sending it to FASTSIGNS as we will only be submitting one proof per order. If you request changes on your first proof those will be accommodated but a new proof will not be sent and we will go directly to print.

Submitting your own file: If you have a designer that is creating your artwork for you. Please have them submit at actual size. We accept .AI .PDF .EPS file formats. If sending a rasterized file (.TIF .JPG .PSD) be sure to save at a minimum of 150 DPI at actual output size of 36"x60" No bleeds will be needed.

Contact: Brad Schultz is available to assist you in your banner order. Please contact him if you have any questions.
